

Initial setup LEADX

First download the Starter Kit zip file by [signin](#) or [signup](#),

Once you've downloaded the file, Simply follow the steps below to get started:

Extract the Zip File

- Locate the downloaded zip file, and simply unzip it.
- After unzipping the file, open the folder and navigate to the `'/leadX`.

Prerequisites

Before running the application, make sure your system meets these requirements:

- This project was developed using **Node.js v20.11.0**. You can download the same version below, based on your system:
 - **Windows (x64):** [node-v20.11.0-x64.msi](#)
 - **Ubuntu/Linux (x64):** [node-v20.11.0-linux-x64.tar.xz](#)
 - **macOS:** [node-v20.11.0.pkg](#)

To check if Node.js successfully installed, follow below steps:

- **Windows Users:** open the command prompt using `'Win + R and type cmd'` and press enter and run:
`node -v`
- **Ubuntu/Linux Users:** Open your terminal and run:
`node -v`
- **macOS Users:** Open Terminal (press Cmd + Space, type "Terminal", then press Enter) and run:
`node -v`

Note: If you have Node.js version below 20, download and install [NVM](#) (node package manager) to manage and switch nodejs version into `'v20.11.0'` Follow the official NVM documentation for installation. [Read docs](#): to install it.

Start the Application

- Open your project directory `/lead_scraper` in terminal or command prompt.

For Windows: Type `cmd` on browser's address bar and press enter.

For macOS: Open the folder in Finder, Right-click the folder (or inside the folder

background), Choose "Services" - "New Terminal at Folder".

For Ubuntu / Linux: Open the folder in Finder, Right-click the folder (or inside the folder background), Choose "Services" - "New Terminal at Folder".

Now run follow below commands:

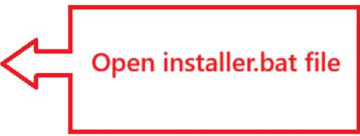

Start Server

Now simply run the `npm start` command to start the server:

- In a few moments, the app will generate a URL (e.g., <http://localhost:3000>). Click it to open the app in your browser.
- Now you will see the below interface on your browser. Just login or create a new account and start your work!
- **⚡ Quick Start (For Windows Users)**
- Once you opened `./lead_scraper`, run the `./installer` file, It will install the necessary packages to run the application.

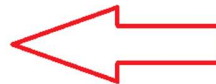

- **Note:** Ensure a stable internet connection, as the process may take time.

Open this file

That's it! Your application is ready to use at: <http://localhost:3000>

What is an Access or Purchase Code?

When you purchase our product, you will receive a purchase code via email. This code acts as your key to unlock full access to the product.

Why Do I Need It?

The purchase code is essential to gain unrestricted access to all the features and functionalities of the product. Without it, your usage will be limited.

How Do I Get It?

Once you complete the purchase, the access or purchase code will be sent to your email. Check your inbox (and spam folder just in case) for an email containing the code.

How to Apply the Purchase Code?

To apply the purchase code, go to the "Profile" section of your account. Look for the "Purchase Code" option and enter the code you received. Once applied, you'll have full access to the product.

The screenshot shows a user's profile settings page. The left sidebar contains navigation options: MAIN (Dashboard, Live Tools, Search Engine Scraper, Social Media Scraper, B2B Directory Scraper, Bulk Contact Scraper, Web Scraper, File-Based Scraper, Domain Tools), SUPPORT (Call Us, Email Us), and SETTINGS (Profile, Log Out). The 'Profile' option is highlighted with a red box. The main content area is titled 'Profile' and 'Personal Settings'. It contains several input fields: Full Name, Email Address, Phone Number (+91 123-456-789), Address, City, State, Country (India), and Pincode. The 'Purchase Code' field is highlighted with a red box and contains a placeholder 'XXXX-XXXX-XXXX-XXXX' with a red 'x' icon to its right. A 'Save' button is located at the bottom right of the form.

Change Log:- check your current Version on top of right corner . if you subscribe newsletter we will send email notification for updates/changlogs . stay tune with us .

Updates :- if you are using lower version and want to upgrade check your Billing plan and support license . once approved download new version (you can make request for version upgrade) and replace all downloaded files/folders within your existing installation folder .
